SEXUAL ASSAULT

In response to a growing concern about sexual assault incidents, the 80th Texas Legislative Session passed House Bill 76. The Bill requires that Texas DPS establish guidelines and collect, as part of the UCR Program, data about incidents that contain specific sexual assault offenses. Sexual Assault crime data collection began in calendar year 2008. Special consideration had to be taken to disseminate the data collection guidelines for Sexual Assault reporting due to the nature of the difference between UCR offense definitions and Texas penal code definitions. In the Texas UCR program, rape is the only offense collected under the crime index. Since there is greater variance in the offenses collected in the compilation of Sexual Assault data, this data collection should in no way be compared to the statistics maintained in the National UCR program.
